

Smart Management Box

SMBOX02 Series

Features

- Integrated design, combining the SMSERVER, smart power management module, power supply switch, heater, fan, and warning light into one. Most IPC and IP Speaker models can be installed on the smart management box.
- Users can remotely monitor the working status of the smart management box and its loaded devices and receive alarm notifications via mobile app and EZCloud.
- Supports automatic restart of output port. When the smart management box detects a network disconnection, it will automatically power down the network devices and restart them.
- Supports manual restart of output port. If devices such as IPC or IP Speaker are faulty, users can manually restart the power supply output port via mobile app and EZCloud.
- Equipped with surge protector, circuit breaker, and software protection function, forming a three-layer protection mechanism to effectively resist risks such as lightning, short circuit, overvoltage, and overcurrent.
- Integrated design eliminates the need for manual wiring, simplifying installation for users.
