Features

- Panoramic dual-lens splicing, three-lens design, capturing both the big picture and details at the same time
- Both the panorama and detail channels utilize 1/1.8" high-sensitivity CMOS sensors to capture clear images even when light level drops to almost zero at night
- Panorama adopts the cutting-edge splicing technology to output a horizontal 200° and vertical 80° stitched image for wide scenes
- Panorama supports a maximum of 3680 × 1656@30 fps HD video output, while details supports a maximum of 2688 × 1520@30 fps HD video output
- Dual-channel with one IP, provides a panoramic view and live details at the same time
- Built-in Wise-ISP algorithm enables intelligent noise reduction and stunning visual effects in low-light conditions
- Panorama supports motorized vertical adjustment from 0° to 30° to deal with complex scenes.
- Supports panoramic linkage: after an event is detected by the panorama channel, the camera automatically triggers the details channel to track the target and capture snapshots. The supported events include intrusion detection, cross line detection, enter area, and leave area
- Supports drag-to-zoom: user can drag on the panoramic image to view the magnified details of the area of interest at the center of the details channel
- Supports multiple deep-learning video content analysis, including smart intrusion prevention (SIP) and people flow counting for the panorama channel, and SIP, people flow counting, multi-target detection, and automatic tracking for the details channel
- Perimeter protection: supports cross line, enter area, leave area, and intrusion detection; supports classifying and detecting motor vehicles, non-motor vehicles, pedestrians, and triggering alarms
- Multi-target detection: supports classifying, detecting, and capturing motor vehicles, non-motor vehicles, and pedestrians; supports metadata extraction for motor vehicles, non-motor vehicles, faces, and human bodies
- People counting: including people flow counting and crowd density monitoring, suitable for various application scenarios
- Auto tracking: supports classifying and tracking motor vehicles, non-motor vehicles, and pedestrians, and returning to the initial

position at the end of the set tracking time

· Supports optical defog, automatically adjusts the defog level as needed

· Full-spectrum illumination: 30 m (98.4 ft) warm light illumination for panorama, and 350 m (1148.3 ft) IR illumination for details

· Adaptive highlight compensation automatically adjusts image brightness at night when there are moving vehicles on the road
· IP67 protection
