# Cloud Managed Gigabit Ethernet PoE Switch

#### NSW2100-9GT1GP-LPOE-IN

#### Overview

The NSW2100 series Gigabit Ethernet PoE switch is a cloud managed switch self-developed by Uniview with high performance, easy to use and maintain. The product adopts the leading high performance hardware architecture and industrial design concepts to enhance the environmental adaptability of the network. It provides a lightweight 2 layers of network basic configuration, including port mirroring, port anti-loop, VLAN, link aggregation, flow control, etc. It supports viewing the device status and managing devices on the Web or app. The switch meets the user's requirements to access the network with highly reliability and low cost, widely used in scenarios such as stores, supermarkets, enterprises, campuses, etc.

#### Features

- Supports Web login, and device configuration and management on the Web interface;
- Supports visiting the cloud by scanning the QR code. Allows to view the device status in real time on the app, and remotely restart the PoE power supply.
- Supports PoE power supply ; allows to enable or disable PoE power supply for the powered device; allows up to 250m power supply using a standard network cable.
- Supports the extend mode for up to 250m communication range and 10Mbps auto-negotiation rate.
- Supports port priority. The packets received by the priority port will be forwarded first when the switch is fully loaded and the priority port will be powered first when the PoE power supply is full.
- All metal casing, secure and reliable.

Maximu	
	um PoE power for single port: 30W
Cooling Fans 0	
Operating humidity 10%~9	90% (non-condensing)
Storage Humidity 5% to 9	00% RH, noncondensing
Software Specification	
Suppor	rts full duplex, half duplex, and auto-negotiation working modes
Suppor	rts enabling/disabling ports
Ethernet Suppor	rts port auto-negotiation rate
Suppor	rts port priority flow control.
Suppor	rts port flow statistics
Suppor	rts four link aggregation groups (up to eight ports)
VLAN allows	up to 10 VLANs with IDs from 1 to 4094
MAC Suppor	rt static MAC, up to 32.
POE Allows	to view PoE status and enable/disable PoE power supply in the APP
Loop Detection Loop Detection	etection
Security Suppor	rts port isolation
Suppor	rts N:1 port mirroring
Maintenance Suppor	rts device upgrade, factory settings restoration, configuration import, configuration
export,	and device restart on the software.
Allows	to view the device name, current version, IP address, MAC address, DNS, etc.
System Allows	to edit and manage the IP address and device name

## Ordering Info

Product Model	Description
NSW2100-9GT1GP-LPOE-	Gigabits PoE Switch
