

Fiber Media Converter Datasheet

FC-1GT1GP-20SC(TR)-IN

Overview

Ethernet optical fiber transceiver can efficiently realize the conversion between 1000M Ethernet electrical port and fiber port. It can carry out long-distance data and video signal transmission via optical fiber, which is convenient for network upgrading and flow control. Adopt international advanced chip and design to ensure the stability and practicability. With ultra low transmission delay and line speed forwarding ability, it can realize flexible Ethernet expansion even in harsh environment. Use standard international optical and electronic components to ensure reliable and stable operation.

Features

- Built-in high efficiency switching core to achieve flow control and reduce broadcast packet
- Automatically adapt to 10/100/1000Mbps network environment, free conversion network upgrade
- Support full-duplex and half-duplex transmission mode, automatic negotiation
- Support 9216 byte packets, monitoring and transmission more smooth
- Complete power link, working mode indicator light, working state at a glance
- low power consumption, low heat, long time stable work, network security advanced
