Overview

ECS-5XS Series is an industrial-grade intelligent analysis device that works with ordinary network cameras. The device is integrated with video decoding, data transmission, data storage, and intelligent algorithms. It receives videos from ordinary network cameras, analyzes objects in the videos, and outputs an alarm upon detection of an abnormal behavior. The device is easy to deploy, operate, and adapts to different environments.

The device utilizes deep learning algorithms to achieve fast and accurate face comparsion and action analysis. It complies with industrial-grade standards, featuring a sophisticated and sturdy appearance, and is suitable for various indoor and outdoor application scenarios. The device offers abundant APIs to meet various application requirements and facilitate integration with third-party systems.
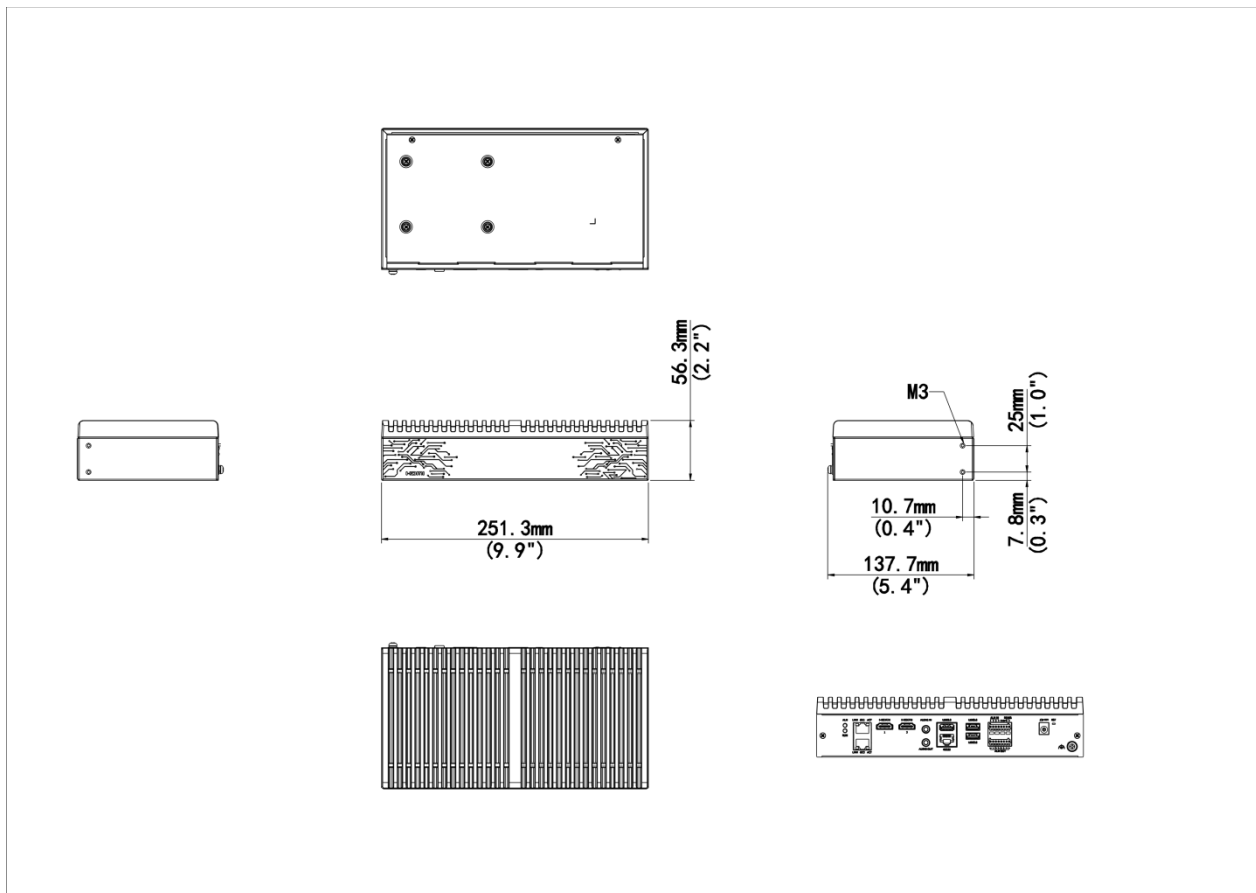

Features

- Supports real-time analysis of 4/8/16-ch 2MP video streams.
- Built-in over 100 behavior algorithms.
- Supports local algorithm warehouse mode, enabling selection of any 20 for deployment.
- Supports face-behavior linkage (identifying the person after detecting an abnormal behavior) .
- Supports generating alarm videos/images and reporting alarm information to third-party platforms via API.
- Supports standard H.264 and H.265 video streams.
- Supports integrating 4/8/16-ch third-party cameras via RTSP.
- Dual Gigabit Ethernet ports enable dual-network IP configuration, adapting to diverse networking environments.
- Supports up to 128 face libraries with 100, 000 face imagesin total.
- Lightweight, fanless structure, flexible deployment, suitable for harsh conditions (including dusty, oily, extremely hot or extremely cold environments) .
