

Harsh Fast Ring Managed PoE Switch ISW5000-8GT4GP-POE-IN

Features

- PoE supports IEEE 802.3af/at standards and provides a maximum output of 30W for each port.
- Data transmission and power supply distance up to 100 meters.
- Supports IEEE802.3x full-duplex flow control and Backpressure half-duplex flow control.
- Panel indicators monitor working status and assist in fault analysis.
- Supports one-click ring network and one-click storm suppression, featuring redundancy and high reliability.
- Highly reliable design, supporting traditional STP/MSTP/RSTP Layer 2 link protection technology.
- Support static convergence and dynamic convergence (LACP) 2 convergence modes, effectively increase the link bandwidth, improve the reliability of the link, and at the same time can achieve load balancing, link backup.
- Flexible and convenient management and maintenance Supports various management modes, such as Console, Telnet, and SSH.
- Supports WEB management, which is simple and efficient, and facilitates installation and debugging by engineering and maintenance personnel.
- Supports file upload and download management through TFTP.

Specifications

| Model | ISW5000-8GT4GP-POE-IN |
